

SMARTER REVENUE, BETTER TECH

Finance & Reporting

How money tagged at the source turns into clean books, clean owner reports, and a clean tax position — automatically.

PRESENTED BY

Elev8 Suite × Mekari Jurnal

EVENT

Canggu Hospitality Association · OXO The Factory, Canggu · 28 Aug 2026

Most Villa Finance Runs Like This

Bank transfers and cash tracked in a spreadsheet, reconciled from memory

OTA payouts arrive net of commission, weeks late, matching no single reservation

Owner statements written by hand — differently every month

Tax filings prepared in a rush, from data never structured for it

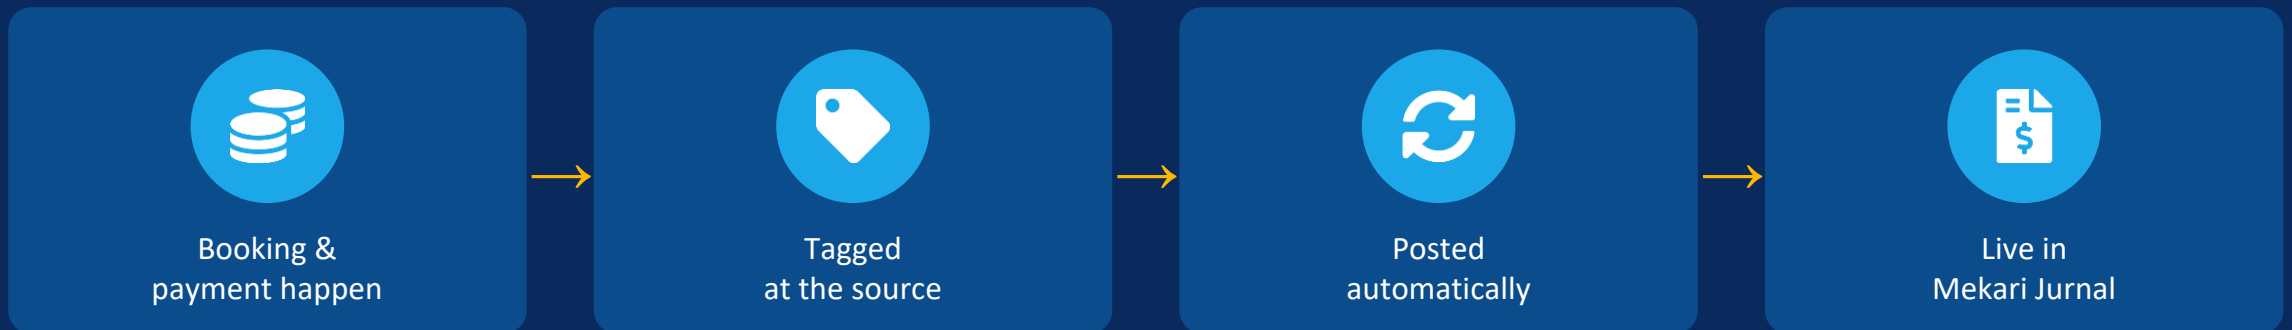

Nobody can answer “what did Villa 3 earn in June” without half a day’s work

None of it is negligence — it’s what happens when a business grows from two villas to twenty without redesigning the finance side.

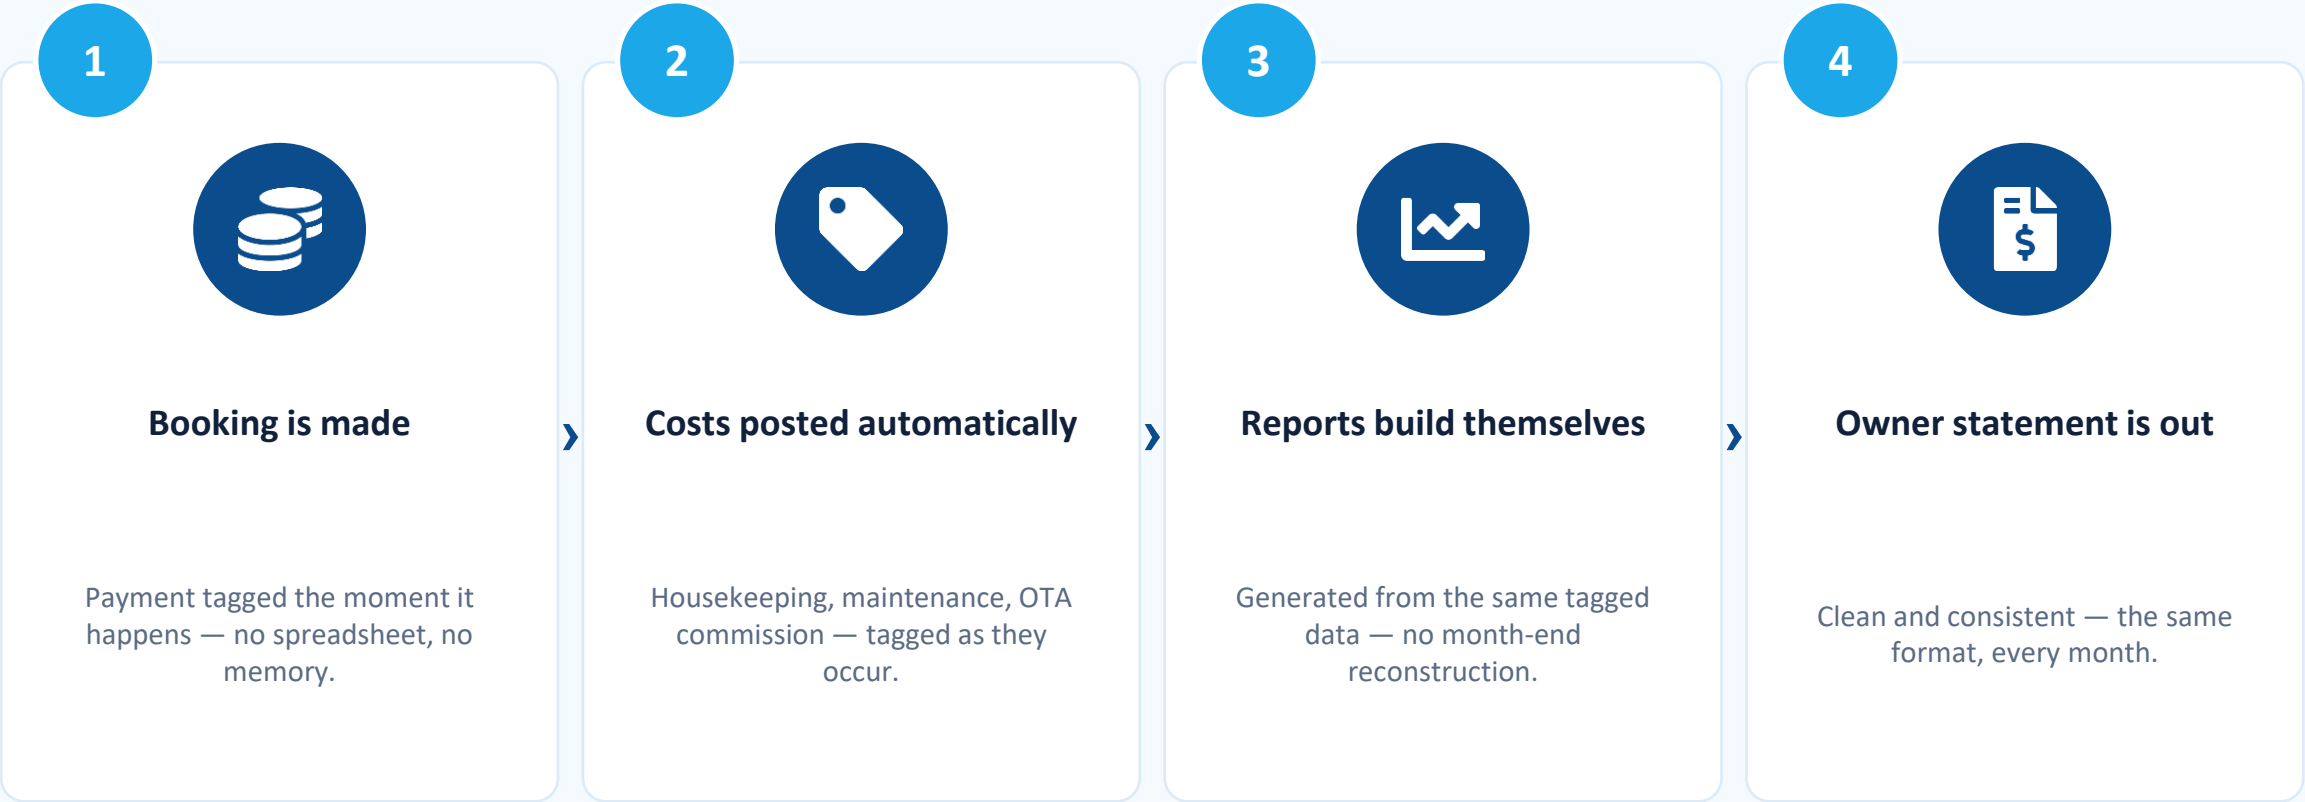

10 MINUTES • THE STORY WE TELL TOGETHER

Every Booking and Cost, Tagged at the Source

Elev8 Suite tags each payment and each expense as it happens, then posts it into Mekari Jurnal automatically. The accounting is not written up after the fact — it is a by-product of the operation running.

One Month of a Villa's Money, End to End

Owner Reports, Generated — Not Rebuilt

Owner reports come out of Elev8 Suite from the same tagged data that flows into Mekari Jurnal. No rebuilding. No month-end reconstruction.

BEFORE

- Built by hand, from memory and bank statements
- A different format and layout every month
- Hours of work before an owner sees a number
- Errors surface only when an owner questions them

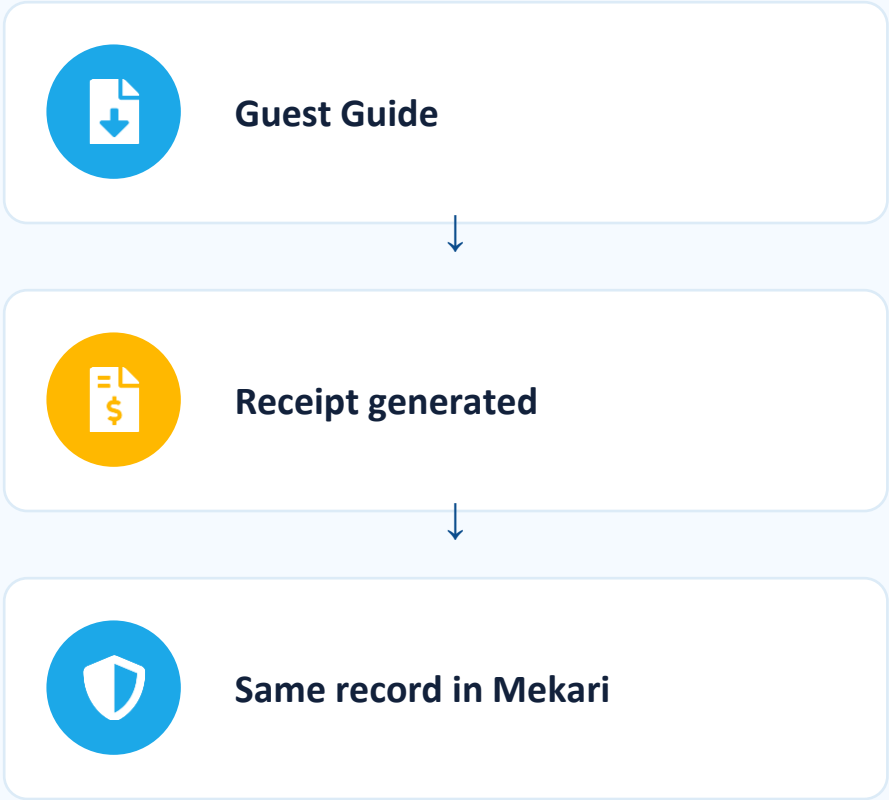

WITH ELEV8 SUITE + MEKARI JURNAL

- ✓ Generated automatically from tagged data
- ✓ Same clean format, every villa, every month
- ✓ Ready in minutes, not hours
- ✓ One record for the operation and the books alike

Guests Pull Their Own Receipts

A guest opens their Guest Guide and downloads the receipt for their stay. Elev8 Suite generates it inside Mekari — the document the guest holds and the entry in the books are the same record.

One document. One record. No reconciliation needed later.

OTA Revenue, Reported Correctly for Tax

Commission, net payout, and the tax position — handled inside Mekari, rather than reverse-engineered from a bank statement.

Commission

Captured at the source, matched to the reservation it belongs to

Net payout

Reconciled automatically — no batch guesswork weeks later

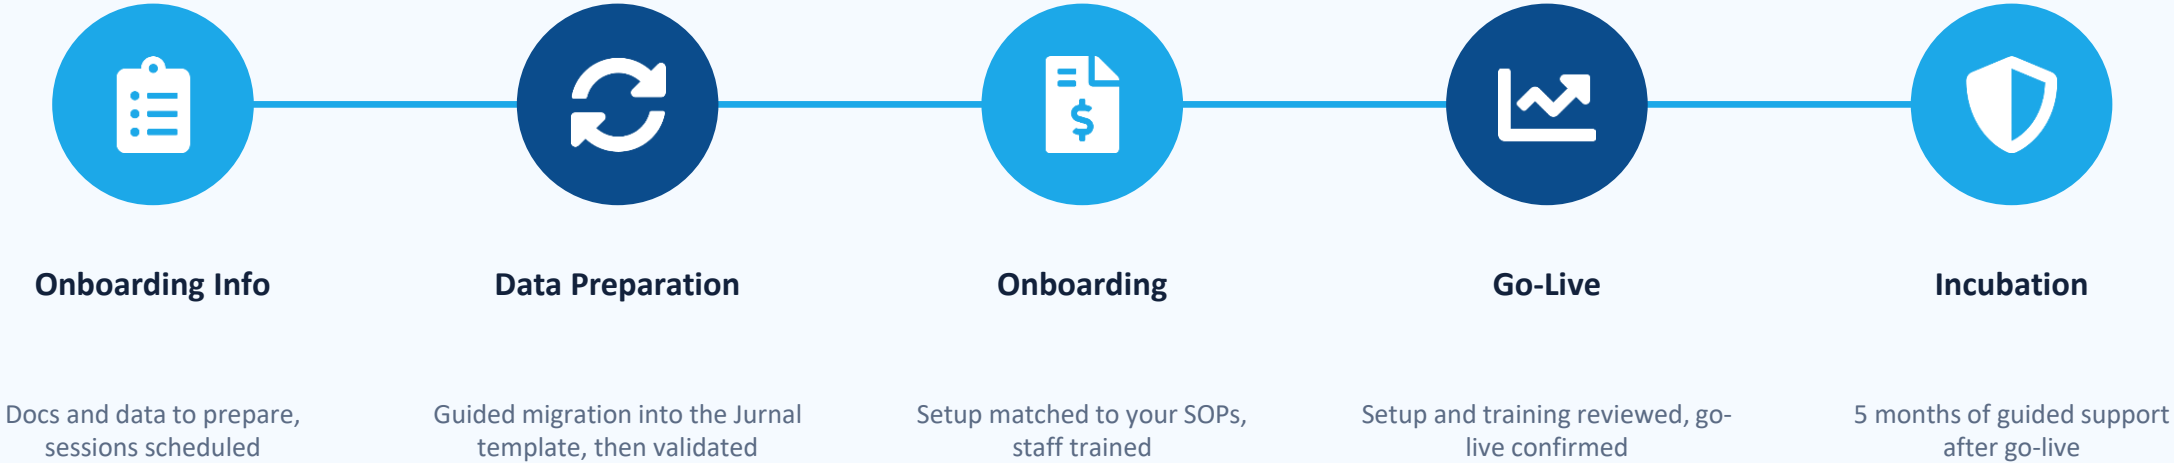

Tax position

Structured for filing from day one, not reconstructed in a rush

Worth saying plainly, once: this combination exists nowhere else — Elev8 Suite is the only PMS that posts into Mekari Jurnal this way.

What the First Month Looks Like

Named plainly: a migration takes about three weeks, and historical data needs cleaning. This room trusts the speaker who names the cost.

Questions From the Room

Send your questions from your phone during the coffee break and back the ones you want answered. Anything tagged finance or reporting comes back to this session
